

Microfluidic Synthesis of Ultrasmall AuPd Nanoparticles with a Homogeneously Mixed Alloy Structure in Fast Continuous Flow for Catalytic Applications

G. Tofighi, A. Gaur, D. E. Doronkin, H. Lichtenberg, W. Wang, D. Wang, G. Rinke, A. Ewinger, R. Dittmeyer, J.-D. Grunwaldt
J. Phys. Chem. C 2018, 122, 1721–1731

Characterization of a Raman Spectroscopic and Holographic System for Gas-Liquid Flows in Microchannels

D. Schurr, J. Guhathakurta, S. Simon, G. Rinke, R. Dittmeyer
Chemical Engineering & Technology 2017, 40(8), 1400–1407

Detection of Copper Bisguanidine NO Adducts by UV-vis Spectroscopy and a SuperFocusMixer

A. Oppermann, L. Laurini, F. Etscheidt, K. Hollmann, F. Strassl, A. Hoffmann, D. Schurr, R. Dittmeyer, G. Rinke, S. Herres-Pawlis
Chem. Eng. Technol. 2017, 40, No. 8, 1475–1483

Continuous microfluidic synthesis of colloidal ultrasmall gold nanoparticles: in-situ study of the early reaction stages and application for catalysis

G. Tofighi, H. Lichtenberg, J. Pesek, T. L. Sheppard, W. Wang, L. Schöttner, G. Rinke, R. Dittmeyer, J.-D. Grunwaldt
React. Chem. Eng., 2017, 2, 876–884

Simultaneous in situ characterisation of bubble dynamics and a spatially resolved concentration profile: a combined Mach–Zehnder holography and confocal Raman-spectroscopy sensor system

J. Guhathakurta, D. Schurr, G. Rinke, R. Dittmeyer, S. Simon
J. Sens. Sens. Syst., 6, 223-236, 2017

Decay kinetics of sensitive bioinorganic species in a SuperFocus mixer at ambient conditions

D. Schurr, F. Strassl, P. Liebhäuser, G. Rinke, R. Dittmeyer, S. Herres-Pawlis
Chem. Eng., 2016, 1, 485

Simultane In-situ-Messung des Sauerstoffverbrauchs und der Produktbildung während der Cyclohexanoxidation

C. Fräulin, G. Rinke, R. Dittmeyer, G. Waters, M. Nilles
Chemie Ingenieur Technik 86, 2014, 524–528.

Characterization of a new system for space-resolved simultaneous in situ measurements of hydrocarbons and dissolved oxygen in microchannels

C. Fräulin, G. Rinke, R. Dittmeyer

Microfluidics and Nanofluidics 16(1-2), 2014, 149-157

In-situ Laser Raman Spectroscopy Adapted to Process Conditions for Studying Cyclohexane Oxidation

C. Fräulin, G. Rinke, R. Dittmeyer

Journal of Flow Chemistry 3(3), 2013, 87-91

In-situ Measurement of the Temperature of Water in Microchannels using laser Raman Spectroscopy

A. Ewinger, G. Rinke, A. Urban, S. Kerschbaum

Chemical Engineering Journal 223, 2013, 129–134

In situ Raman imaging combined with computational fluid dynamics for measuring concentration profiles during mixing processes

G. Rinke, A. Wenka, K. Roetmann, H. Wackerbarth

Chemical Engineering Journal 179, 2012, 338– 348

Combined measurement of concentration distribution and velocity field of two components in a micromixing process

M. Wellhausen, G. Rinke, H. Wackerbarth

Microfluidics and Nanofluidics 12(6), 2012, 917-926

Raman-Spectroscopy for measuring concentration profiles within micro channels

G. Rinke, A. Ewinger, S. Kerschbaum, M. Rinke, K. Schubert

Optical Technologies in Germany 2009, Technologiestiftung Innovationsagentur Berlin, 62-63

Einsatz der Raman-Spektroskopie in der Mikroverfahrenstechnik

G. Rinke, A. Ewinger, S. Kerschbaum, M. Rinke, K. Schubert

GIT Labor-Fachzeitschrift 52(6), 2008, 568 - 570

Industrielle Anwendungen der Mikroverfahrenstechnik

G. Rinke, K. Schubert

GIT Labor-Fachzeitschrift 52(4), 2008, 397 - 399

Winterization of biodiesel by micro process engineering

S. Kerschbaum, G. Rinke, K. Schubert

FUEL 87(12), 2008, 2590 - 2597

Einsatz von Mikrowärmeübertragern in Kälteanlagen

G. Rinke, A. Ewinger, K. Schubert

KI Luft- und Kältetechnik 42(11), 2006, 474 - 477

Einsatzmöglichkeiten von Thiolen und PTFE als Anti-Haft-Schichten für Mikrowärmeübertrager

G. Rinke, S. Kerschbaum, E. Nold

Chemie Ingenieurtechnik 78(5), 2006, 599 – 606

Fluidic bus system for chemical process engineering in the laboratory and for small-scale production

A. Müller, V. Cominos, B. Horn, A. Ziogas, K. Jähnisch, V. Grosser, V. Hillmann, K.

A. Jam, A. Bazzanella, G. Rinke, M. Kraut

Chemical Engineering Journal 107(1-3), 2005, 205 - 214

Fluidisches Bussystem für die chemische Verfahrenstechnik und für die Produktion von Feinchemikalien

A. Müller, V. Cominos, V. Hessel, B. Horn, J. Schürer, A. Ziogas, K. Jähnisch,

V. Hillmann, V. Grosser, , K. A. Jam, A. Bazzanella, G. Rinke, M. Kraut

Chemie Ingenieurtechnik 76(5), 2004, 641 – 651

Measurement of the temperature dependant viscosity of Biodiesel fuels

S. Kerschbaum, G. Rinke

FUEL 83(3), 2004, 287 - 291
